### THE DEED IS DONE!

# THE BATTLE IS RAGING! TERRIBLE SLAUGHTER.

THE GUNS ARE BOOMING AND A FEARFUL CUTTING IN THE WHOLE LINES!

### A GREAT MANY WOUNDED, BUT NONE DEAD!

The above heading may read very sensational, but it is the full truth, that from this day on till January 1st (inclusive) every article in my Store will be offered AT AND BELOW COST! By doing this I will naturally lose money during this red letter sale, but my customers as well as those who wish to patronize me shall be convinced that D. KLASS will not be undersold by any one.

Now is the time to take Advantage of this Great Opportunity and Lay in Your Supplies.

I have lought too heavy—the season for Fall Goods was short. The only remedy left for me is to unload (as I never believe in carrying stocks over from season to season) and the way of unloading quick is to put

The Bagger in the Prices up to the Handle, without regard of the Losses. My Motto is: "First Loss, Best Loss."

Here are some of the Cuts and Slashes that will be made, (I can not give them all, on account of limited space) during this RED LETTER SALE:

of the next Congress. The statue of Dapont which is new in place will be unveiled with appropriate ceremonies on the 20th, inst. Senator flayard will be the orator of the occasion. The statue is considered a very creditable work. It bears a very striking likeness to the officer commemorated, and makes a notable addition to the art treasurers of the Capital. The figure is of heroic size, in bronze, and the subject is represented standing upon the deck of his vessel, with his head uncovered and raised, as if gazing at a vessel in the distance. In both hands he holds a binocular, which has just been lowered from his eyes, the action being followed by an intent gaze with the naked eye. The sculptor was Mr. Launt Thompson, of Philadelphia, and the cost of the statute was \$13,000, and of the pedestal and preparations, \$6,890.

CITY AND COUNTRY BOYS.

M. Quad's "Short Talk" to the Ambillous

[Detroit Free Press.] As to the difference between city and country boys it lies entirely in the training. The farmer's son may have the most intelligence as a child, but natural intelligence must be trained and cultivated or it becomes low cunning instead of wisdom. The country boy has a district school, run in almost any fashion, while the city boy has grade! schools conducted on the wisest system. So long as he is kept in the country the farmer's boy town in the matter of education.

#### A Smart Stakeholder. [Cor. Philadelphia Times.]

There are a number of "sports" in Baltamore who are at present in a very unhappy frame of mind. They made divers bets the result of the election and put the money, amounting to nearly \$9,000 in the hand of a saloonkeeper on Baltimore street to hold. Just here the trouble comes in, f. It seems that the saloonkeeper aforesaid at 1 "holds" it, or at least the "sports" cannot ge their hands on it. Some of them called on him a few days ago for their wagers on separate states and were dumfounded when told by him that he had bet the money put in his hands and lost it.

The men who are out of pocket have no redress, as there is no way in law by which Ithey can reach the saloonkeeper, but soin. of them are swearing vengeance, and hay that they will "take it out of his hide." The betters say that he employed one or two wellknown meu about town to go around and make bets, he furnishing the money, the sum total of the wagers always to be place t in his hands to hold until the result waknown. In this way he would use the same money over and over again, his agents always being ready and willing to bet any way that the other party might wish, knowing that it was a sure thing, however the slection might go.

#### True Courage. [Southern Bivouac.]

In all ages, courage on the battle-lield has been the theme of orators and poets, yet the conrage of the warrior is not only a common and variable quality, but has often been surpassed by that displayed by women. Native valor, too, is sometimes inferior to that which is acquired. Frederick, the Great ran like a coward out of his first battle. Flying ou the wings of fear, he went a great distance from the field, and, coming to one of his own strongholds, reported that his army was destroyed. What was his surprise and mortification to learn that his men had gained a great victory. He never forgot the lesson taught, and over afterward was conspicuous for steady courage in action.

Many instances might be given of soldiers in the last war who, in their first fight, were "lily-livered." but who afterward faced with dauntless front the gleaming steel; and on the other hand, of some who were lionhearted till taught by the paln of a wound the perils of a battle, and who then became notable cowerds. ### SHERIDAN'S RIDE.

NEW FACTS ABOUT LITTLE PHIL'S FAMOUS EXPLOIT.

Interesting Incidents Noted on the Spot hy a Busy Man About Camp-How Sheridan "Got the Bulge

on Them."

[John Daaby in Philadelphia Times.] I have seen a painting representing the general coming on the scene on that occasion riding his big black horse (which was given to him by some Michigan friends), and, by the way, I have heard the cavalrymen curse that borse in vigorous terms. He was the fastest walker in the army, and when the general was riding at the head of the column on the march the rest of the command would be kept on a little jog-trot about balf of the time, and any cavalryman knows how trying that is, especially for the non-combatants, such as cooks, camp carriers, etc., who are loaded down with camp and garrison equipage. I could always tell at night when I heard our cavnlry marching near me if the general was in the lead by the jingle of tia and iron kettles as they closed up in the rear. Well, this painting that I mention shows the general with sword in hand, a broadbrimmed stiff regulation hat, with waving plume on his head and looking very much excited, as, of course, he had a right to be under the circumstances.

But the artist drew very largely on his imagination. It would be hard to exaggerate the beauty and majerty of the horse, for he was the beau ideal of a war horse—big, black, vigorous, champing his bit, nostrils red and dilnting, his long tail swinging to and fro like a banner-it would be hard to picture anything more striking or grand than the big black on that occasion. But as to the general, excepting that his eyes were blazing and flerce, there was not much signs of excitement shown by him.

He wore some of the regulation uniform, but not mach. On his head was a little round cap, such as German students wear. In his right hand he held a small riding whip, which, judging by the welts on his horse's flanks, had been industriously used. He was splashed with mud and had a big daub under one eye, which gave him a sort of "been-to-a-wake look." If he had any gauntlets they were in his pockets. As he rode on the hill beyond Middletown be was it was finished. met by one of Gen. Tobert's aids, who was mounted on a big gray horse nearly as large

The officer jumped the stone wall and joined the general just as he came in sight of group near the woods on the right of the pike in the rear of the Sixth corps, where Gens. Wright, Emory and Torbert and their

staffs were gathered. I asked the ald afterward what the general said when he joined blm. He replied: "Well, the general's first words were, 'It was has no show at all compared to his friend in just such a d-d mess out west as this that gave me my brigadier star in the regular army, and I'm going to make it a double star this time. He then asked, 'Where is farmer's son has no associates outside of his wright!" and soon after joined the other own class. The seml-solitary life of the farm generals. I had been riding along behind as has few refining influences. The work must fast as my little mare could jump, when the be done whether or no, and farm-workers general looked back and said: "Scout, hunt cannot expect time to cultivate song and up the ammunition wagons and order them up." Back in the rear on the valley pike the general's staff were making their way up as fast as they could. I transferred my orders to one of the aids, for I knew the demoralized social condition of the American farmer is teamsters would not pay much attention to faces, till both of them cut the most luit immeasurably superior to that of any similar a man in a blouse, and then turned and rode

When I reached the group on the hill I saw And now, my boy, let me say to you that of his chin had been cut away by a bullet lighting in Squire S.'s office. None dared early in the morning, and he was otherwise avocation you intend to pursue, you have ad harmed probably, as he seemed to be dazed and not to have his wits about him for the hend. There are no social barriers to keep time. Gen. Emory, "Old Bull of the Woods," you down. An honest, truthful, respectable as some of his wild young calvary staff boy or man can step right to the front with called him, commander of the Nineteenth out capital. His merits are recognized and corps, stood by with his hands crossed is hind his back, looking down at Gen, Wright. of twenty, ten, or even five years ago. Every tien. Torbert leaned on his horse and pulled his mustache, and Gen. Sheridan was quietly asking questions from all of them. In a few moments he knew all they could tell him, and pulling a dispatch book from his pocket began by writing something which he put in a little dispatch envelope and addressed, and then looking up his eye fell on me and blazed up in a moment. He said, "What in the d-l are you doing here! I thought I sent you after the ammunition wagons!" I explained matters to him. He gave me a sharp look and said: "You've got a healthy gall to order my staff officers about. Take this dispatch to Winchester as quick as you can," and then away he rode down the line. Presently one of the staff came galloping after me before I had gotten more than a mile beyond Middletown, and took the disatch and told me to go back, and said he was to go to Wluchester and order up all the stragglers, and would attend to the dispatch

> So back again I went and rode about all the rest of that busy day, getting what in-formation I could and carrying orders for any one who wanted me. I gave the newspaper correspondents considerable information, which they worked up to suit themselves. The best account of the fight was written by the correspondent of The World. Near the close of the tight I was near Gen. Forbert, on the left, when Gen. Sheridan came flying across the pike, jumping the high stone walls on each side. He said, in his earnest, quick way: "Torbert, I took the old Sixth corps in and drove them from the woods and over the hill and away from the stone walls, and I have got the bulge on them; and now, Torbert, I want your cavalry to do your best, and when I go back I am going ln with everything, and if you and Merritt and Custer do your work well we will have them on the run in half an hour,' and history shows that they did do their work well. Considering the fact that the Eighth corps was not engaged during the day, and that full one-third of the rest of the command, except the cavalry, were skedaddlers, and that about half of the artillery were captured early in the morning, it was an even fight, and Gen. Sheridan won it by good hard knocks and bull-dog fighting. Gens. Wrlght, Torbert and Emory would undoubtedly have made a good fight of it if Gen. Sheridan had not onne up from Winchester, but it took Sheridan to get the "bulge on

### A BATTLE OF GIANTS.

They Wanted the "Fellow Who Wrote That Article." Temperary Disturbances. [Western Letter.]

About twenty-five years ago, when a cer tain western state was a territory, and with few inhabitants, a young lawyer from New York emigrated thither and settled in the town of L—. He had been there nearly two years when he was induced to print a weekly newspaper, of which he was the editor. Squire S. was a very little man, but he used the editorial "WE" as frequently as If there were a dozen of him, and each as hig as a giant. Strange to say, there were at that time

men in office who were not a particle more honest than they should be; a thing which probably never happened before, and never will again. Squire S. felt all the patriolism of a son of '76, and poured out grape and great number of persons have been thrown canister against public abuses. This soon out of employment. The very change which stirred a hornet's nest about his ears; but as there was no other paper in the territory there was no reply for a time.

At length he published an article mors vere against malfeasance in office than any that had preceded it. In fact, though it pointed at no indvidual in particular, it was

Some three or four days afterward he was sitting alone in his editorial office, which was about a quarter of a mile from the printing establishment. His pen was busy with a paragraph, when his door opened, and in stalked a man about six feet in his stockings. lie asked: "Are you S., the proprietor of this paper?" Thinking he had found a new patron, the little man, with one of his bland-est smiles, answered in the affirmative. The stranger deliberately drew the last number of the paper from his pocket, and pointing to the article against rogues in office, told the affrighted editor that It was intended for

It was in vain that S. protested that he had never heard of him before. The wrath of the visitor rose to a fever heat, and from being so long restrained boiled over with double fury. He gave the editor his choice, either to publish a very bumble recantation or take a flogging on the spot. Either alternative was wormwood, but what could he dol The enraged office-holder was twice his size, and at one blow would qualify him for an obituary notice. He agreed to retract; and as the visitor insisted upon writing the retraction be himself sat down to the task. Squire S. made an excuse to walk to the printing office, with a promise he would be back in season to sign it as soon as

8. had bardly gone tifty yards when ho sucountered a man who inquired where Squire 8.'s office was and if he was a. bome. Suspecting that he too was on the same errand as the other visitor, he pointed the field, and rode side by side towards a to the office and told him he would that the editor within, writing a most abusive artiele against office-holders. This was enough. The eyes of the new-comer flashing fire, ho rushed into the office and assaulted the stranger with the epithets, "liar, scoundrel, coward," and told him be would teach hum how to write.

The gentleman, supposing it was some isully sent there by the editor, sprang to his feet, and a fight ensued. The table was upset and smashed into firewood, the contents of a large jug of ink stood in puddles on the floor, the chairs had their legs and backs broken beyond the skill of surgery to cure them. This seemed only to inspire the combatants with still greater fury. Blow followed blow with the rapidity of lightning First one was kicking on the floor, then the other, each taking it in turn pretty equaliy The ink on the floor found its way to their crous figure imazinable

The noise and uproar were tremendous. The neighbors ran to the door and exclaimed Gen. Wright sitting on the ground, the tip with astonishment that two niggers were separate them. At length, completely exhausted, they ceased fighting. The circumstances of the case became known, and the next day, hardly able to sit on horseback their beads bound up, they started home-ward, carrying with them the most striking evidences of their attempt to redeem their

#### Miss Merosini. (Brooklyn Eagle,)

How absurdly the descriptions of Miss Morosini were exaggerated in the newspapera. Instead of the beautiful creature 1 expected to see, when she sang at Steinway hall, I found a stumpy sort of a woman with a face that might have belonged to a bousemaid or a cook and with awkward and uncomfortable manners. I have come to the conclusion that Schelling is not to by me much envied after ali. Miss Morosini posesses about as much pretensions to beauty us an average shoe factory girl, and she sings in the high and somewhat nasal soprano prevalent in boarding-house back parlors. iie cems to feel rather discouraged, as it is, though his wife is in a fair way to make money. The talk about her singing in grand opera, or even opera of any sort, is the wild est sort of nonsense. If people want to go and see Miss Victoria Morosini Schelling Hulskamp simply because she has become notorious as a banker's daughter who married a oachman, they are at liberty to do so, of course, if they are willing to pay \$1.50 for the sight. It would be perhaps just as well not to rave about the beauty and genlus of a woman who is not attractive in the slightest legree, nor endowed with more than the most ordinary of musical accomplishments.

The other evening be was in conversation with the conductor reparding his discovery, and being very much interested in its wonderful medicinal properties, he raised his voice so as to attract the attention of all the passengers in the car. "Why," said he, "my medicine will knock the cholera higher than a burnt boot. i wish It would come here, nni I would show you how quick I would conquer it and make my fortune besides" "What's the matter with your going out there where it is and wrestling with lt?' blandly suggested the genial conductor. "Why, I might catch it myself," innocently) replied the would-be cholera exterminator, and the roars of laughter that filled the cars at that moment so confused the worthy inventor as to cause Ils sudden retirement to the smoking car.

MACHINERY AND LABOR.

Has Machinery Bisplaced Human Labor (New York Wribune.)

In every civilized land, at this time, there is complaint that times are bard. Everywhere the cause is said by many to be overproduction. But how can it be a cause to mankind to have the objects of human desire supplied in greater abundance and more cheaply? If there is overproduction all this natural suggestion, we are told that a vast amount of labor has been displaced by machinery, that a general disturbance of the labor market has been caused, and that a some call a blessing brings ruin to many producers, and forces many employers to cut down wages, and curtails the ability of workers to consume products of other in-dustries. Thus we are taught to believe that the progress of science and invention is a progress toward human misery.

Is it true, then, that machinery has displaced human labor! A century ago relatively fewer persons were employed in any other avocation than in tilling the soil than are now so employed. Machinery has created a new world; it has cheapened almost everything that man desires. it has brought within the reach of the humblest not only a vast aumber of products wholly unknown a century ago, but luxuries and comforts which a century ago even the richest could not afford to commonly enjoy. Meanwhile has it displaced labor! On the contrary, it has made work for a vast population outside of the ruder arts which were formerly pursucd. Has it displaced the shoemaker! No: more persons than ever tefore are making shoes, because more shows are made and used, cheapness permitting multitudes to wear them who formerly could not. So there are more sewing-girls, in spite of sewing-ma

There are more farm-workers, in spite of ricultural machines. There are all the more cotton and woollen and silk weavers in spite of thos: aumerous improvement which seem to do with steam and iron the work of bunian hands letter than human hands could do it. And to crown all, the wages in all branches of labor have risen. In every occupation, from the rudest to the most skilled, from farm labor to the most delicate manipulation of tools and machinery, labor is better paid in money than it was before the age of invention. And, moreover, each dollar of the money re-ceived will buy far more food than a dollar would have bought a century ago, far more clothing, and more things for the supply of

all human wants. Thus it is simply blundering to say that nachinery does, or can, in the long run, supplant or displace human labor. On the centrary, the use of machinery is limited only by the human labor that can be brought to employ it. Every labor-saving invention cuables one human want to be more cheaply supplied, so that a part of the human labor expended in satisfying it can be turned to the supply of other wants. The overgresiuntion theory, except as limited to a very nar-row field, and within a narrow compass of time, is altogether without foundation. The liunian race as a whole does not suffer because its powers of production are mereased, or because its wants can be more easily and cheaply supplied, or because things needed tor human comfort and use are more abund intly produced. Temperarily, and within ome particular market, production may at mes so far entrun the demand that a disturbance results. But this is not the phe nemenon which we are now witnessing

It isn't posible that any living woman would have tailed to detect the humbug to which a barber successfully subjected a man in my presence the other day. time taking any real part in the talk, "that your sister's state is not quite all it should be. For the last day or two I have been hinking of sending for the medical man who attended her during her unfortunal confinement. He has not seen her for quite a week. I mentioned it to her this afternoon, but she appears to have taken an unnecountable dislike to him, and utterly refused to see him. I do not wish to alarm you-l merely mention this; no doubt you, her brother, will see to it."

The peculiar stress she laid upon the word "brother" toil me that I was right in thinking the woman was acting, and that not for one moment dld my assumed fraterulty decelve her. This was of nn consequence. "lam myself a sloctor. Her health will

be my care," I said. Then I arosa.
"You are related to Sir Mervyn Ferrand, I believe, Mrs. Wilson?" I asked. She gave me a quick look which might

mean anything. "We are connections," she said, care-

leady. "You must have been surprised at his sending his wite away at such a time?" "I am not in the habit of feeling surprised at Bir Mervyn's actions. He wrote to me and told me that, knowing my circumstances were straitened, he had recommended a lady to come and live with me for a few months. When I found this lady was

his wife, I own I was, for once, surprised," From the emphasis which she laid on certain words I knew it was but the fact of Philippa's being married to the scoundrel that surprised her, nothing else, I could see that Mrs. Wilson knew Sir Mervyn Ferrand thoroughly, and something told me that her relations with him were of a m ture which might not bear investigation.

Forewell to my aimless, so fish existence. Hence forward I should have something worth hising for-worth dying for, if needs be! This ippe was condrg to me to-day, coming la grief, it is true; coming reasister comes 1 Ah! after all the weary, weary a liped her waiting, I shall see her to-day-to-morrow, every day! If a man's devotion, hemage, worship and respect can in her own eyes prinstate my queen, I shall some day see the bloom come back to her cheek, the bright smile play once more round her mouth, the dark eyes again eloquent with happy thoughts. And then-and then what should I care for the world or its succest To when, save myself, should I be answerabled Then I might whilsper in her car. "Sweet, let the past vanish from our lives as a dream. Let bappiness date from to-day."

Although Philippa would grace my poor cottage for one night only, I had a thousand preparations to make for her comfort. Fortunately I had a spare room, and, moreover, n furnished one. Not that I should have troubled, when I went into my seclusion, about such a superfluity as a guest-chamber; but as it happened I had bought the lonse and furniture complete, so could offer my welcome guest fair accommodation for the

I summoned my solid man. I told him that my sister was coming on a visit to me. that she would sleep here to-night, but that most likely we should go away to-morrow. He could stay and look after the house until I returned or sent him instructions what to to with it. William manifested no surprise. Had I told him to make preparations for the coming of my wife and five children be would have considered it all a part of the day's work, and would have done his best to

meet lay requirements He set towark in bls apporturbable, methedless, but barely way to get Philippe's room in trun. As soon as this was done, and the neglected chamber made cosy and varm-looking, I told him to borrow a horse and cart somewhere, and fetch the luggage trom Mrs Wilson's. He was to mention no nnmes; simply to say that he had come for the luggage, and to ask if the lady had any

message to send. Then I sat down in the room which my love would occupy and mused upon the strange but unhappy rinner which was bringing her beneath my roof. I wished that I had an enchanter's wand to turn the lumble garniture of the chamber into surroundings meet for mr queenly Philippa. I wished that I had, at least, flowers with which I could deck be: resting place; for 1 committeed how passionately she leved flowers. Alast that not seen a flower for

the writer in my heart. William was away about two hours; then he made his appearance with some boxes. I was delighted to see these tangible signs that Philippa meant to keep her promise. Thi that moment I had been troubled by something like the doubt that after all she might, upon calm reflection, rescind the resolution formed in her excitement. Now

her coming seemed to a certainty. Novertheless, William brought no message; so there was nothing for me to do but wait patiently until she chose to cross my

His letter nnned no particular hour; but I saw that if he carried out his expressed Intention ul being here to-night, there was but one tesis. by which he could come; there was but one way from Roding to the house at which Philippa had been staying. He meant to Wallon's adv. in this isue,

walk, his letter mid; this might be in order to escape observation. The train was due at Roding at 7 o'clock. The weather was cold; a man would naturally walk fast. Mrs. Wilson's house must be four miles from the station. Let me start from there just before the train arrives, and I should probably meet him about half way on his journey. It would be dark, but I should know

I should know him among a thousand. There on the open lonely road Sir Mervyn Ferrand, confing gayly, and in his worldiy cynlcism certain of cajoling, linying off, or in some other way sliencing the woman who had in an evil day trusted to his honor and love, would meet, not her, but the man who from the first had sworn that n wrong to Philippa should be more than a wrong to himself | He would meet this man and be called to account.

Stern and sinister as were my thoughtsfreely and unreservedly as 1 record them. as indeed I emleavor in this tale to record everything-I do not wish to be misjudged. It is true that in my present mood I was bent upon avenging Philippa with my own hand; true that I meant, If possible, to take at some time or another this man's life; but at least no thought of taking any advantage of an unarmed or ansuspecting man entered into my scheme of venguance. I designed no murderous attack. Itut it was my intention to stop the men on his path; to confront him and tell him that his villalny was known to me; that Philippa had fled to me for aid; that she was now in my custody; and that I, who stood in the position of her brother, demanded the so-called satisfaction which, by the old-fashloned code of honor, was due from the man who had ruthlessly betrayed a woman. Well 1 knew that it was probable he would laugh at me-tell me that the days of duelling were over, and re-fuse to grant my request. Then I meant to see if insults could warm his noble blood; # my hand on his cheek could bring about the result which I desired. If this failed I would follow him abroad, came him and spit npen him in public places.

A wild scheme for these prosaic, law-abiding days; yet the only one that was feasible. It may be said that I should have taken steps to have caused the recreant to be ar rested for blgamy. But what proof of his crime had we as yet, save his own, unalgued confession! Who was to move in the matter-Philippa-myself! We dld not even know where this wife of whom he had spoken lived, or where she died. There were a hundred ways in which he might escape from justice, but whether he was punjshed for bla sin, or allowed to go scot-free, I'hllippa's name and wrongs must be brnited about, her shame made public. No, there was but one course to take, an I but one person to take it. It rested with me to avenge the wrongs of the woman I loved by the good old-fashioned way of a life against a life.

Truly, as I sail, I had now pienty to live The hours went by, yet Philippa came not I grew restless and uneasy as the dusk is gan to make the road, up which I gazed a neet continually, dim and indutinct. When the short winter's day was over, and the hing dark night had fairly begun, my rest essuess turned into fear. I walked out al my house and paced my garden to and fro-

I Idamed myself for having yielded so light ly to Philippa's wish-her command, rather that I should on no account fotch her list then, whenever did I resist a wish, much less a command, of heral Ob, that had been firm this once!

The snow-atorm of the previous evening had not lasted long-not long enough to thereaghly whiten the world. The day led been fine and frosty, but I know that the wind had changed sluce the sun went down It was warmer, a change which I felt sure presage I a heavy downfall of sacow or rain. There was a mood a titful moon; for cloudwers flying across It, dark clouds, which I guessed would soon gather coherence and volume, and veil entirely that bright face, which now only showed Itself at irregular

The minutes were passing away. I grew nervous and excited. Why does she not comel My liope had been to see my poor girl safely housed before I started to execute my other task. Why does she not come Time, precious time, is slipping by ! In the hope of meeting her, I walked for some dis-tance up the road. "Why does she delay? I groaned Even now I should be on my way to Roding, or I may miss my try Heavens can it be that she is waiting this man once more! Never! never! I'erish the thought!

Yet now I dared not leave my own house. Any moment might bring Philippa What would she think if I was not there to receive and welcome herl

Five more precions momenta gone! 1 stamped in my rage. After all, I can only lo one half of my task; the sweet, but not the stern half. Shail I, indeed, do either! The train must now be close to Roding. In an hour everything may be lost. The man will see her before she leaves the house. He will persuade her. She will listen to his words; for did he not once love her! He must have loved her! After all, he broke be hiws for the sake of possessing her, and cursed thought!-she loved blin then; and

sho la lut à woman! So I tortured myself until my state of mind grew unbearable. At all hazards I must prevent Ferrand from mosting Philippa. Oh, why had she not come as she promised? Could it be she was detained against her will! In splte of her uninterested manner I distrusted the woman I had seen last night. It is now past seven o'clock. Phillppa's house, from which I had reckened my time, was nearly three nilles away. I must give up my scheme of vengeance. I must go in search of Philippa. If I do not meet her I must call at Mrs. Wilson's, flud ont what detains her, and if needful bear her

away by force. By this time my steps had brought me back to my own house. I called William, and told him I was going to walk up the road and meet my expected guest. If by any chance I should miss her he was to welcome her on my behalf, and tell her the reason for

niv almence. "Best take a laulern, sir," sald William; 'moon'll be hidden, and them roads is preious rough."

"I can't be bothered with that great horn affair," I said, rather testily. "Take the little oue—the bull's eye—that's botter than nothing," said William. To lin-

mor him I put it into my pocket. I ran at the top of my speed to the house at which I had last night left Philippa. It took me nearly half an hour getting there. I rang the bell impetuously. The door was opened by a maid servant. I inquired for Mrs. Farmer, knowing that Philippa had passed under this name to all except her hostess. To my surprise I was told that she had left the house, on foot and alone, some little while ago. The mald believed she was not going to return, as her luggage had that

morning been sent for. The ilret effect of this intelligence was to cause me to blame my haste. I must have missid her; no doubt passed her on the roal. No: such a thing was impossible. The way was a marrow one. The meen still gave

some light. If I had met Philippa I must have seen her. She must have seen me, and would then have stopped me. She could not have gone the way I came.

But where was shel in what direction was I to seek her? Argue the matter as I would-loath as I was to allow myself to be convinced, I was bound to decide that she must have taken the path to Roding. There was no other. She had gone, even as I was golag, to meet Ferrand. She may have etarted, intending to come to me; but at the more—I fundly hoped for the purpose of heaping reproaches on his head—had mastered her. Yes, whatever her object might be, she had gone to meet him. And my heart sank as conviction was carried to it by the remembrance that coupled with her refusal to permit me to fetch her was an assertion that she had something to do before she came to me. That, as I now read it,

could be but one thing—to meet this man! Never again, if I can help it, shall his voice strike on her ear! Never again shall their eyes meet! Never again shall the touch of even his finger contaminate her! Let me follow, and stand between her and the scoundrel. If they meet he will wound her to the heart. Her pride will rise; she will threaten. Then the coward will try another line. He will plead for mercy; he will awear he still loves her; he will lait his hook with promises. She will listen; hesitate; perhaps yield, and that berseif once more deceived. Then she will be lost to me forever. Now she is, in my eyes, pure as when first we met. Let me haste on, overtake, pass her; meet her betrayer, and, if

needful, strike him to the ground. As I turned from the house I became aware that a great and audden change had come over the night. It seemed to me that, even in the few minutes which I had spent in considering what to do, the heavy clouds had banked and massed together. It was all but pitch-dark; so dark that I pansol, and drawing from my porket the lantern with which William's foresight had provided me, managed after several trials to light It. Then, impatient at the delay, I sped up

I was now almost facing the wind. All at once, sharp and quick, I felt the blinding snow on my face. The wind moaned through the leafless branches on either side of the road. The snow fiskes whirled madly here and there. Even in my excitement I was able to realize the fact that never before had I seen in England so fierce a snow storm, or one which came on so suddenly. And, like myself, Philippa was abroad, and exposed to its full fury. Heavens! she might loss her way, and wander about ali

night.
This fear quickened my steps. I forced my way on through the mad storm. For the time all thought of Sir Mervyn Ferrand and vengeance left my heart. Ail I now wanted was to find Philippa: to lead her home, and see her safe heneath my roof. "Surely," I said, as I intued along, "she cannot have gone much further."

And for a dreary comfort I recalled the utter bitterness of her accent last night when she turned to me and said. "Basil, did you ever hate a man?' No, she could not

These thoughts brought my craving for vengeance back to my mind. Where was rand! By all my calculations, taking into account the time wasted at starting. I should by now have met him. Perhaps he had not come, after all. l'erhaps the look of the weather had frightened him, and he hal decided to stay at Itoling for the night. I raged at the thought! If only I knew that Phillippa was safely housed, nothing, in my present frame of mind, would have sulted nue letter than to have met him on this lonely road, in the midst of this wild atorm. If I'hillppa were only safe !

Still no sign of her. I began to waver in my mind. What If my tirst supposition, that I had passed her on the road, was correct! She might be now at my cottage, womlering what had become of me. Should I go further or turn back! But what would be my feelings if I dld the latter and found when I arrived home that she had not made her appearance f

I halted, irresolute, in the centre of the road. Instinctively I beat my hands to-gether to promote circulation. I had left my home hurrledly, and had made no provision for the undergoing of such an ordeal as this terrible, unprecedented snowstorm luffic ed. That Accounts for His Poelry.

[Through Mall.] Oscar Wilde now states that he writes all bie poety on an empty stomach. Well, he looks like a man that would do fool things like that. All the hard-headed posts of the world have written their poems on paper or pareliment, but Oscar, It seems, is too esthetic for that. What we would take great pleasure in knowing, however, is where the long haired, rattled brained boss dude of the world gets his atomachs.

President of the New Orleans Cotton Ex-

EDMUND INCHARDSON. The president of the great New Orleans exposition of the world's products and manufactures is Edmund Richardson, who, by reason of lik being the largest cotton planter in the world, deserved this recognition, as the exposition originated in the idea of and will be largely devoted to a display of cotton and its multitudin our uses. The cx position will be opened on Dor. 16 and se main so six months. An idea of the imagin sity of the buildings which Mr. R chards a has tak n a bading part in having erected, may lo gained from the fact that the roof of the main building alone covers 53 acres and has more space than the famous Crystai palace, London.

To Major E. A. burke, the proprieto: and editor of the New Orleans Times-Democrat, is also probably more than any other lashvidual the successful culmination of the gigantic exposition enterprise in his city. The major won his title in the confederate and is an acknowledged His outhusiasm led blin to accept the stupendous work and responsibility which the director-generalship of this vast enterprise imposes, refusing, however, the large emolument attached to the position, which salary he donated to the agricultural college of Louisiana. Though a leader of the southern Democracy the appointments of Major Burke prove him incapable of exhibiting the slight est partisan or sectional spirit. He has chosen then. George B. Loring, of Mass., chief of agricultural department; George Y. Johnson, of Kansas, superintendent of ngricul-

ture; Gen. John Eaton, of Connecticut, chiel of educational department; Hon. Parker Earle, of Illinois, chief of horticulture; Hon. Oliver Gibbs, Jr., of Minnesotn, commissioner for the northwest; and Hon, H. K. Bruce, chief of the colored department

FANNY FLASLER How the world has changed! The death of Pana . She was the rival of the great Taglioni, and the most famous dancer that ever lived. She attained credit for capturing more hearts by the movements of her feet than Cleopatra conquered with her beauty.

Born in Vienna, in 1817, at the age of 17 sho was concidered the best dancer in Enrope. It was at this time that a son of Napoleon I. fell in love with her. He frequented the theatre nightly, but it was only on his deathbed he avowed to his friends his lifelong passion. In 1833 Veron, the director of the French opera, went to London to induce her to go to Paris. At a grand dinner given to win her favor he presented her with a dessert plate full of diamonds and rubies. In 1839 she came to America at the solicitation of Chevalier Wykoff, the celebrated Philadelphia beau. In the book of his adventures which Wykoff published some five years before his death he writes

of the great danseuse: "She was above the medium height, finely formed, and her features well shaped. Her countenance was sweet and winning, her more was low and musical, and her every more more was an indication of grace.

Senatorial Chirography.

[Edmund Alten in St. Nicholas.] Some of the Senators were rather reckiess in their chirography, and frequently one of them would simply hand to me, while I was a page, a scrap of paper with some writing on It, without saying anything at all, expecting me to understand what he wished. I would turn these notes upside down, side-ways and cornerways, and could hardly tell from the hieroglyphics whether the words were good old Angle-Saxen or Hebrew. One time I saw ou a desk a piece of paper that had on it a comical likeness or image of a human skeleton in miniature. was, and in handling the paper I chanced to turn it nnother way. And what do you think it was! It wasn't meant for a skeleton, after all. It was nothing else than a very hasty autograph of Senator George F. Edmunds.
